B.sc (Computer science) from **Andhra Loyola College** from Vijayawada in 2019.

TECHNICAL SKILLS

Test management tool	: Jira
Testing Tools	: Selenium Web driver, Jenkins, GIT
Testing Frameworks	: TestNG, Cucumber, Extent Reports
Java Technologies	: Core Java
IDE	: Eclipse, IntelliJ
Build tool	: Maven
Database	: SQL
Methodology	: Agile with Scrum Framework

DOMAINS WORKED:

Insurance:

Arch Insurance is to enhance the underwriting agility at point of sale. To accomplish this, more rule criteria will be made available to externalized rule processes. This includes information currently collected on applications as well as other information about the current book of business, growth plans and geographic risk. Additionally, it is introducing enhanced capabilities to restrict, require or limit certain deductibles or coverages based on location related criteria.

Client	: Arch Insurance Company, USA
Role	: QA Test Engineer
Tools used	: IntelliJ, TestNG, Extent Reports, Cucumber & BDD

Responsibilities:

- Analysing the Story Cards, Functional Requirement documents, other mapping documents and Application flows.
- Developed Test plan, test cases and Daily status report in Agile methodology.
- Identified correct GUI elements using various Selenium locators like ID, Name, Tag name, link test, Partial link text, X-path and CSS locators to find the web elements.
- Involved in designing a test automation framework with Selenium, TestNG and Cucumber BDD.
- Discussing the complexity and estimated hours for completion of each and every user story card in the sprint planning.
- Performed Sanity and Regression Testing of the Application at different levels.
- Capable of design & development of automation frameworks.
- Automate the Test Cases to conduct periodic regression testing for multiple builds and releases.

E-Commerce:

Belk is an upscale department store. It offers national brands and private label fashion apparel, shoes, accessories, cosmetics, a wedding registry and home furnishings. Belk uses its own online payment service to allow for buyers and sellers to pay each other. Although members are not restricted to using this form of payment: PayPal and Skill (Money bookers) are also integrated payment methods. Sellers and buyers can use any payment method by mutual agreement but this would not be integrated

Client	: Belk E-commerce
Role	: QA Analyst
Tools used	: Jira, Zephyr, Excel and Word

Responsibilities:

- Writing and Reviewing the Test scenarios, Test cases, Executing the test cases and coordinating with developers in fixing the issues reported during sprints / releases.
- Performed smoke testing, Sanity testing, retesting and regression testing.
- Defect tracking and reporting using JIRA.
- Involvement in Sprint planning, Grooming, Retrospective and review meetings.
- Sending daily and weekly status reports.
- Ability to prioritize and schedule multiple tasks on day-to-day basis.
